

Tenure-Track Assistant/Associate/Full Professor
Focus in Infectious Diseases
Experimental and Clinical Pharmacology,
College of Pharmacy, University of Minnesota
(Last revised February 10, 2016)

The University of Minnesota College of Pharmacy (COP) Department of Experimental and Clinical Pharmacology (ECP) invites applications for a tenure track position at the rank of Assistant, Associate or full Professor, with a focus in Infectious Diseases. Our faculty are committed to our common mission, which is to advance the science, teaching, and practice of human pharmacology and therapeutics to improve the safe, effective, and economical use of medications in patients. Our faculty are also committed to the education of Doctor of Pharmacy and graduate students who, together with our staff, work to discover, apply and disseminate new knowledge to support our mission. Candidates who share our Department's commitment to outstanding research, innovative teaching and leadership in the optimization of drug therapy are encouraged to apply. The COP is ranked among the outstanding pharmacy education and research institutions in the world. It is located within one of the largest academic health centers in the U.S., with nationally recognized programs in public health, medicine, nursing, dentistry, and veterinary medicine.

Major campus research facilities include a Clinical and Translational Science Institute, the University of Minnesota Super Computing Institute, Genomics Center and Comprehensive Cancer Center. In addition, numerous affiliated health care systems with exceptional research and educational programs partner with the COP. The Twin Cities also has a large number of cutting-edge biomedical companies eager to collaborate with the academic community. The close proximity of the College to this research-rich environment provides unequalled opportunity for faculty to excel.

Ideal candidates are expected to have an established record of funded, clinical or translational research in the area of infectious diseases. Although priority consideration will be given to those candidates with expertise in human pharmacology and therapeutics related to bacteriological based research, related areas of research (e.g. microbiome) will be considered. Individuals with skills that complement our existing strengths in pharmacology, pharmacokinetics, pharmacodynamics and pharmacometrics, and those with a working knowledge of the practice of pharmacy and demonstrated experience in the teaching of pharmacotherapy to healthcare professionals would represent ideal candidates. The candidate will be expected to contribute to the instruction of professional pharmacy and experimental clinical pharmacology graduate students.

Successful candidates will possess an earned doctorate degree (e.g., Pharm.D., M.D., Ph.D.). The candidate must possess excellent teaching and communication skills. Evidence of a successful peer-reviewed publication record in the area of infectious diseases in appropriate journals is required. Post-doctoral training in infectious diseases, board certification or eligibility in pharmacotherapy and infectious diseases would be considered highly desirable. Evidence of a record of strong academic, industrial, or organizational leadership will strengthen the application.

Candidates must be eligible for appointment at the rank of Assistant, Associate or full Professor at the time of employment. The University of Minnesota offers an exceptional benefit package including faculty retirement program and excellent medical, dental and disability insurance programs. A competitive salary and start-up package are offered commensurate with the candidate's experience and skills.

For specific questions about this position, please contact the search chair, John C. Rotschafer, Pharm.D., FCCP at: **rotsc001@umn.edu**

Your complete application should include:

1. Your curriculum vitae and letter of interest. The letter of interest should explain your qualifications for the position.
2. A statement of research goals (attached as "Additional Document").
3. Arrange for three letters of recommendation (electronic copies are preferred) to be sent separately to Kirsten Domer at **dome0019@umn.edu**

Recommendation letters can also be sent to:
University of Minnesota College of Pharmacy
c/o Kirsten Domer
5-130 Weaver Densford Hall
308 Harvard Street SE
Minneapolis, MN 55455-0343
