

On-Demand CE Webinar Making Sense of Susceptibility: Breakpoints and Cumulative Antibiogram Reports

CLSI recently revised some "breakpoints," or criteria for interpreting susceptibility results, which can impact patient reports and the cumulative antibiogram. Join your colleagues to review some of the recent changes in the breakpoints, including how they evolved and how they can be implemented. This webinar will also discuss preparation of a cumulative antibiogram according to recommendations in CLSI document M39, and how to optimally use cumulative antibiogram data for prudent prescribing and antibiotic stewardship.

On-Demand Webinar: Cost: \$25
(fee waived for SIDP and ACCP ID PRN Members with code)

Faculty:

Janet A. Hindler, MCLS, MT(ASCP)
Sr. Specialist, Clinical Microbiology
UCLA Medical Center

Sharon M. Erdman, PharmD
Clinical Professor, Department of Pharmacy Practice
Purdue University School of Pharmacy
Infectious Diseases Clinical Pharmacist
Co-Director, Outpatient Parenteral Antimicrobial Therapy Program

Learning Objectives:

- Review criteria used to set breakpoints and the reasons why CLSI susceptibility breakpoints may change.
- Discuss recent CLSI breakpoint revisions and their impact on laboratory reporting.
- Describe the methods that should be used when preparing cumulative antibiograms.
- Discuss the use of the cumulative antibiogram when selecting antimicrobial therapy.

This webinar was originally broadcast March 7, 2013. Note: If you attended the live CE activity AND received CE credit (i.e. a pharmacist CE statement of credit with ACPE UAN 0221-9999-13-023-L01-P), you are NOT eligible to also receive credit for this home-study on-demand web activity.

ProCE is accredited by the Accreditation Council for Pharmacy Education as a provider of continuing pharmacy education. ACPE Universal Activity Number 0221-9999-13-029-H01-P has been assigned to this knowledge-based home-study CE activity (initial release date 4-8-13). Full accreditation information at registration website.
