REPORTS TO:  Director of Pharmacy  
Pharmacy Clinical Operations Manager or designee

SUMMARY

The Clinical Pharmacist Specialist–Infectious Disease is responsible for the provision of safe, effective, appropriate and cost-efficient medication therapy to patients in the area of Infectious Disease. Under direction of the Director of Pharmacy he/she will assist in the planning, organizing and monitoring of the delivery of pharmacy services for Alameda Health System

DISTINGUISHING FEATURES

An incumbent in the class of Clinical Pharmacist Specialist – Infectious Disease coordinates the pharmacy services within AHS and its clients. In contrast to incumbents in the classification of Pharmacist who prepare and dispense drugs, the incumbent in the classification of Clinical Pharmacist Specialist – Infectious Disease have advanced post graduate training or equivalent experience and possess a broad scope of pharmacotherapy knowledge and skill for providing direct patient care as well as providing complex, in-depth clinical services. In addition to administrative duties, the Clinical Pharmacist Specialist provides consultation to the staff and to clients.

SPECIFIC PHARMACY PRACTICE RESPONSIBILITIES:

1. Develops, enforces and maintains policies and procedures that promote and enhance patient outcomes through safe, effective, cost-efficient and appropriate medication therapy use for patients receiving antimicrobials.

2. Coordinates programs designed to minimize medication errors, adverse drug reactions and medication misuse with regards to medication preparations in infectious disease through improved reporting, analysis and follow-up.

3. Coordinates and maintains the antimicrobial stewardship program, including:
   a. Overseeing daily prospective audit of antimicrobials
   b. Assisting in development and maintenance of an antimicrobial formulary approved by the medical staff.
   c. Working with the infectious disease service to evaluate appropriate use of restricted antimicrobials
   d. Developing guidelines, policies, and other monitoring and intervention strategies for antimicrobial use and streamlining prophylactic, empiric, and definitive antimicrobial therapy
   e. Compiling data and metrics on antimicrobial use
   f. Working with the Antimicrobial Stewardship committee to maintain and update the Highland Hospital Empiric Therapy Guide.
   g. Reporting data and findings to the Antimicrobial Stewardship, Infection Control and Pharmacy & Therapeutics Committees.
   h. Coordinating, facilitating and promoting education, training, competency assessment and performance improvement of pharmacists, pharmacy residents and other healthcare professionals in the appropriate use of antimicrobials

4. Serves as pharmacy consultant rounding with Infectious Disease consult service

5. Precepts PGY1 pharmacy residents and pharmacy school students in Infectious Disease rotations.
ESSENTIAL RESPONSIBILITIES OF A CLINICAL PHARMACIST:

1. Works with the Director of Pharmacy or Pharmacy Clinical Operations Manager to coordinate, expand and deliver pharmacy services with AHS.

2. Monitors patients in a specific unit/specialty service with includes collecting patient-specific data, performing relevant physical assessments, interviewing patients, and identifying patient goals of therapy.

3. Assesses patient-specific medical problems, prioritizes medical problems based on urgency and severity and identifies preventive and health maintenance issues.

4. Evaluates patient-specific drug therapy and therapeutic problems by evaluating appropriateness of drug therapy, assessing effectiveness, and identifying potential interactions or adverse effects.

6. Documents clinical interventions in a timely and professional manner.

7. Monitors and reports drug errors, adverse drug reactions, allergies, and patient adherence issues.

8. Collaborates with patients, caregivers, and other healthcare professionals.

9. Develops and maintains the drug formulary for ACMC as well as provides education for physician and other healthcare providers regarding additions and revisions to the formulary. Includes preparing drug monographs and cost analysis for presentation to committees, staff, physicians and other staff.

10. Review and evaluate requests for non-formulary and restricted drugs.

11. Evaluates medical information and retrieves biomedical literature using appropriate search strategies and interprets biomedical literature with regard to study design, methodology, statistical analysis, significance of reported data, and conclusions.

12. Possesses knowledge of current evidence-based practice and serves as a drug information resource for other healthcare providers and team members.

13. Represents Clinical Pharmacy Services on various committees, staff meetings and professional meetings as needed as it relates to the pharmacy area of practice/specialty.

14. Coordinates continuing education activities for medical and nursing staff; orients new employees on pharmacy practices and procedures. Includes submissions to the pharmacy newsletters, participating in journal clubs, and providing in-services to professional staff.

15. Assists in establishing and supervising record keeping, auditing and other drug control policies and procedures as required by County, State and Federal laws.

14. Participates and contributes to ongoing performance improvement projects for the pharmaceutical care services provided.
15. Serves as a preceptor to pharmacy residents, students, and volunteers.

16. Performs other duties as required based on the needs of the department and under the supervision of the Director of Pharmacy or Pharmacy Clinical Operations Manager.

QUALIFICATIONS REQUIRED:

A Doctor of Pharmacy (Pharm.D.) degree is preferred. Successful completion of a Pharmacy Practice residency or equivalent clinical experience in direct patient care delivery required. Completion of a PGY2 Advanced residency in infectious disease, fellowship, and/or board certification is preferred.

LICENSE REQUIRED

A current California Pharmacist license is required.

REQUIRED AGE-SPECIFIC COMPETENCIES
