PFIZER CANADA PHARM D FELLOWSHIP IN ANTIMICROBIAL STEWARDSHIP

*“Getting patients the right antibiotics,
when they need them”*

EXECUTIVE SUMMARY

COMPLETING A PFIZER
CANADA FELLOWSHIP IN
ANTIMICROBIAL
STEWARDSHIP WILL
PREPARE A PHARMACIST
WITH THE KNOWLEDGE
AND SKILLS NEEDED TO
DEVELOP A SUCCESSFUL
ACADEMIC CAREER IN
ANTIMICROBIAL
STEWARDSHIP.

Description

A Pfizer Canada Pharm D Fellowship in Antimicrobial Stewardship with the MSH-UHN Antimicrobial Stewardship Program provides support for highly qualified candidates who have a dedicated interest in the area of infectious diseases and antimicrobial stewardship.

Funds Available

Fellowships are for two years, and are funded at the level of \$50 000 (CDN) + benefits per annum. The fellowships are taxable.

Objectives

The specific objective of this fellowship is to prepare a pharmacist for an academic career in Antimicrobial Stewardship by:

- ✦ Learning the core knowledge required to perform antimicrobial stewardship-related program development, research and clinical work, including biostatistics and clinical epidemiology, patient safety and quality improvement, economics and public health
- ✦ Gaining experience in antimicrobial stewardship research from taking a research idea from contemplation to completion
- ✦ Learning to work as a core member of a multi-disciplinary team

The structure of the fellowship will include didactic, practical and research components. For the didactic component, we are partnering with the prestigious VA Quality Scholars Program offered through the University of Toronto Centre for Patient Safety. Admission to this program is not guaranteed, although applicants offered a Pfizer Fellowship in Antimicrobial Stewardship would be viewed favourably. (Should an applicant be unsuccessful in applying to the VA Quality Scholars Program, the MSH-UHN ASP will structure a didactic program with similar content.) Additionally, fellows will be expected to participate in “The Steward’s Room”, a regular interactive educational series addressing the evidence surrounding stewardship issues. The practical component will include experience in performing audit and feedback with healthcare providers at MSH and UHN, experience developing protocols and clinical pathways in a multidisciplinary setting, participating in hospital committees surrounding the activities of antimicrobial stewardship, and educating colleagues on issues regarding antimicrobial stewardship. Finally, the research component will involve developing a research hypothesis, performing a literature review surrounding the topic, developing and refining a research protocol, submitting the protocol for research ethics approval and peer-reviewed funding, and carrying out the research. The MSH-UHN ASP will provide additional content, logistical, research and biostatistical expertise as necessary.

Eligibility

- ✦ As the applicant, you must be a Pharm D graduate of an AFPC-recognized school of pharmacy or demonstrate comparable clinical experience and be eligible for licensure with the Ontario College of Pharmacists.
- ✦ Prior completion of a general practice residency is preferred
- ✦ In addition to a core member of the MSH-UHN ASP, you may have a second supervisor of your primary research project.
- ✦ This award is held Mount Sinai Hospital, although various aspects of the fellowship will be carried out at both Mount Sinai Hospital and University Health Network.

Guidelines

Holders of the Pfizer Canada Pharm D Fellowship in Antimicrobial Stewardship will be expected to comply with all professional standards as outlined by the Policies and Procedures of Mount Sinai Hospital including (but not limited to) Appropriate Use of Information Technology, Code of Ethical Conduct, Confidentiality of Personal Health Information, and Diversity & Human Rights.

The Fellowship will commence as early as May 1, 2013, and may commence on the 1st day of any month up until September 1, 2013.

Review Process and Evaluation

Review Committee

A review committee consisting of the ASP Program Director, two ASP pharmacists and two ASP physicians will evaluate the full applications (see below). Eligible applicants whose application is deemed suitable will be invited for an interview to take place in late January-early February 2013.

Evaluation Criteria

Candidates will be evaluated by the committee on the basis of:

- ✦ Achievement and activities of the candidate
- ✦ Research potential as identified through prior research and the quality of the research proposal
- ✦ Clinical and collaborative potential as identified through reference letters and other supporting documentation

How to Apply

Important: Please read all instructions with the application process before applying. Incomplete applications will not be processed. We will email all applicants upon receipt of a complete application only.

Submission Requirements

- + The full application includes a cover letter, a CV, and 3 letters of reference. The full application—including letters of reference—must be received no later than January 25, 2013.
- + A cover letter
- + The CV should include:
 - Educational history
 - Employment history **as it pertains to the fellowship application**
 - Research publications, according to whether peer-reviewed or invited

- + Send all documentation to:

Funding Decision

One Pharm D fellowship position is available for funding. If no suitable candidate for the Pharm D fellowship position is identified, that funding will be made available to an eligible MD applicant for the equivalent MD Fellowship position. Similarly, if no suitable candidate for the MD fellowship position has been identified, that funding will be made available to a second eligible Pharm D.
