Job Description

We are recruiting two antimicrobial stewardship/infectious diseases clinical pharmacists. The Pharmacist will demonstrate consistent application of knowledge and skills to deliver appropriate, safe, efficient, effective and cost effective pharmaceutical care in the scope of their particular assignment. This position will be responsible for the care of patients as well as the development of effective, professional relationships within the multidisciplinary team.

Responsibilities include:

- Day-today antimicrobial stewardship, including VigiLanz alerts to optimize antimicrobial therapy
- Rounding with the Infectious Diseases Consult Team (teaching team with internal medicine and/or podiatry residents)
- Precepting pharmacy residents and students on clinical rotations
- Serve as a medication therapy resource for other clinical pharmacists, pharmacy students, pharmacy residents, pharmacy interns, physicians, medical residents, nurses, and patients.
- Developing protocols and managing antimicrobial stewardship projects and initiatives.
- Participation in departmental and interdisciplinary committees to improve patient safety, therapeutic outcomes, and cost savings
- Be responsible for the care of patients as well as the development of effective, professional relationships within the multidisciplinary team.
- Opportunities for collaborative clinical research are available and encouraged.
- Serve as a member of the System-wide Antimicrobial Stewardship team by participating in team activities including monthly meetings, training, projects, and research.

Additional Salary Information: Intermountain Healthcare offers a comprehensive health, dental, and retirement benefits packages to all pharmacy employees (including a pension plan). In addition, meeting registration and travel to clinical meetings are included. Adjunct clinical faculty appointments are available.
