

**Request for Proposals**  
***Infectious Diseases Pharmacy Residency***

The Board of Directors of the Society of Infectious Diseases Pharmacists (SIDP) is pleased to announce the availability of funding for one Infectious Diseases Pharmacy Residency for the period of **July 2023 through June 2024**. The intent of this funding is to foster the development and/or expansion of new advanced training opportunities for pharmacists committed to the practice area of infectious diseases pharmacotherapy.

Applications will be considered from programs developing a new infectious diseases specialty training program in 2023 or established programs expanding the number of available infectious diseases resident positions.

SIDP will provide funding to support the resident salary for one year plus fringe benefits and will include \$1,500 to support participation in the SIDP Antimicrobial Stewardship Certificate Program and some travel support to attend the SIDP live Business Meeting at IDWeek™ (total grant not to exceed **\$75,000**). The program will be responsible for any additional funding required to support resident salary plus fringe benefits.

SIDP members who have received an SIDP Residency Grant award as Residency Director in the past, institutions who have received an SIDP Residency or Fellowship Grant award in the past three years, and current members of the SIDP Board of Directors are ineligible for these awards.

Members who are awarded funding must send a copy of the letter of acceptance from the resident plus CV and proof of PGY1 residency training to Shelley Warnock ([sidp@affinity-strategies.com](mailto:sidp@affinity-strategies.com)) no later than May 1, 2023 or the award will be rescinded. A midpoint and final report of the resident's activities (e.g., rotations including stewardship activities, key presentations, longitudinal research) will be also required.

**Completed applications should be electronically submitted as follows:**

Applications should be entered online at the SIDP website ([www.sidp.org/training-awards](http://www.sidp.org/training-awards)) using the resident award application [form](#). The RPD cover letter, two (2) letters of support, and curriculum vitae (up to 4) should be converted to a single PDF file and uploaded. Other information will be directly inserted on the web form.

Questions regarding submission may be submitted to the SIDP Board Member-at-Large, Alan Gross ([aegross@uic.edu](mailto:aegross@uic.edu)). **Proposals must be submitted no later than 5 PM E.D.T. on August 15, 2022.** Applications submitted after this deadline will not be considered. The Board of Directors will make decisions on the applications no later than **September 14, 2022**.

Applicants are encouraged to refer to the [ASHP](#) Educational Outcomes, Goals, and Objectives for Postgraduate Year Two (PGY2) Pharmacy Residencies in Infectious Diseases. These guidelines were prepared by ASHP, in collaboration with ACCP and SIDP, and endorsed by the SIDP Board of Directors. SIDP supports the utility of the ASHP Educational Outcomes, Goals, and Objectives for PGY2 Pharmacy Residencies in Infectious Diseases for any residency funded by SIDP. SIDP also requests grant awardees to seek ASHP accreditation for applicants applying for a new program.

## Criteria for Award Evaluation

### Residency Program Director/Primary Preceptor:

1. Is an Active member of SIDP at the time of application and not currently serving on the Board of Directors.
2. Has completed advanced training in ID pharmacotherapy (PGY2 residency or fellowship) or has at least 3 years of experience as an active clinical practitioner or researcher in ID pharmacotherapy and has attained BCIDP.
3. Has experience in precepting or directing postgraduate training for at least 3 years.
4. Demonstrates commitment to further development of the ID residency with ongoing institutional support after SIDP funding period.
5. RPD and preceptor qualifications evaluated include clinical service, precepting experience, scholarship, and service to the profession
6. SIDP members who have received an SIDP Residency Grant award as Residency Director in the past, institutions who have received an SIDP Residency or Fellowship Grant award in the past three years, and current members of the SIDP Board of Directors are ineligible for these awards.

### Institution:

1. Is capable of providing a full range of training experiences that may include inpatient care, outpatient care, antimicrobial stewardship, pediatrics, HIV, microbiology laboratory, infection control, telemedicine, and a longitudinal experience. Antimicrobial stewardship need not be the focus of a program, but it should be an important element. Please describe training experiences in relation to the patient population and resources of the institution. Institutions in rural areas and/or of socioeconomic disadvantage are strongly encouraged to apply.
2. Has administrative support of the residency training program as indicated in an accompanying letter of support. The administrative support should indicate commitment to a plan for a sustainable, institution-supported ID residency following SIDP funding year (i.e., the program will sustain beyond 1 year).
3. Has adequate space and resources identified to support resident training.
4. Has existing infrastructure to support a specialty training program.
5. Has not received an SIDP Residency or Fellowship Grant award in the past 3 years.
6. Institutional environment factors, including pharmacy practice model, multidisciplinary collaboration including infectious diseases or other key stakeholder physicians, and patient populations served will be considered.

### Residency Candidate:

1. Possesses a Doctor of Pharmacy degree from an ACPE-accredited school or college of pharmacy.
2. Has completed a PGY1 Residency, is currently in training in a PGY1 residency program that will be completed before the start of this program, or has equivalent pharmacy practice experience

### Residency Program:

1. Follows the [guidance](#) of the ASHP Accreditation Standard for PGY2 Pharmacy Residency Programs.
2. Program characteristics, including clinical rotation experiences, opportunities in teaching, research, service, and trainee's role in antimicrobial stewardship program

## Required Elements for Application

1. A cover letter for the application from the proposed residency director. The letter should include the following components: rationale for development of a new program or expansion of a new position, preceptor and institution qualifications, and program goals. The letter should be limited to a maximum of 3 pages.
2. A letter of support from Director of Pharmacy Services or administrative equivalent at the primary facility where residency training will occur. This letter of support should also include administrative commitment to a plan for ID residency support following SIDP funding year and statement supportive of the program ultimately seeking ASHP accreditation.
3. A letter of support from a key stakeholder physician (e.g., Chief of Infectious Diseases or antimicrobial stewardship physician) who will work with the resident during the training program.
4. A current curriculum vitae for the program director and for up to three additional individuals who will serve as preceptors during the training experience.
5. A description of the institution where primary training will occur. It is recommended to include a description of the following: pharmacy department structure; pharmacy practice model; infectious diseases services infrastructure; service lines/patient population. Responses should be limited to 500 words or less.
6. A description of resident opportunities in teaching/academics, research and professional/community service. Responses should be limited to 750 words or less.
7. A description of rotation experiences. Responses should be limited to 500 words or less.
