

CLINICAL PHARMACY SPECIALIST, INFECTIOUS DISEASE

Chicago, Illinois

Our client, a multi-hospital system located in the greater Chicago area is looking for an Infectious Disease Clinical Pharmacy Specialist. This is a brand new position for the system. Reporting directly to the System Director of Pharmacy, the Clinical Pharmacy Specialist-Infectious Disease will serve as a resource for the development and implementation of clinical programs for the pharmacy throughout the entire system. He/She will plan, organize, monitor and lead an Antimicrobial Stewardship Program to optimize clinical outcomes, promote cost effective therapy and improve care while minimizing adverse effects and development of resistance of antimicrobial usage in the hospital. You will mentor staff on the implementation of new clinical duties. The Pharmacist will work with Infectious Disease Physicians and Antibiotic Stewardship clinicians with focus on antibiotic usage evaluation, patient safety and quality improvement initiatives as outlined by Medicare, the Joint Commission, and other agencies.

Qualified candidates will have a minimum of 3 years of Hospital System experience with significant Infectious Disease expertise and/or PGY-2 residency training.
